

# Progression in the teaching of fractions Year 1-6

Some images have been copied from NCETM PD materials

Y1-6

# FRACTIONS

Throughout the teaching of fractions, three key models are used in order to provide a wide and varied understanding of fractions.

These include:

## Area models

It is important to vary these images using representations that challenge pupils thinking and understanding.

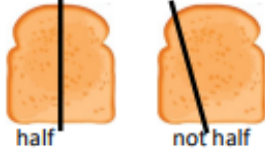

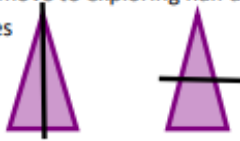

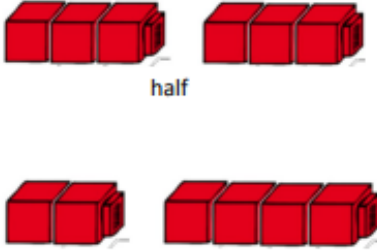

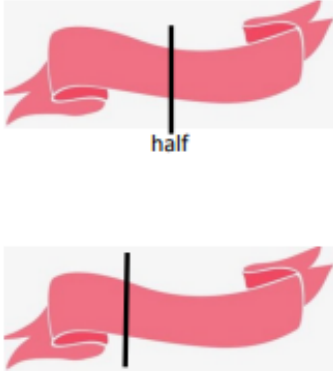

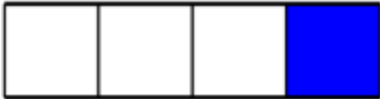

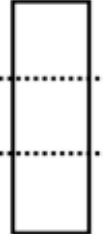

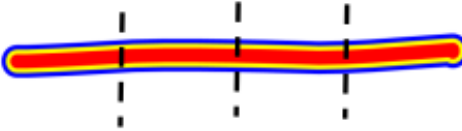

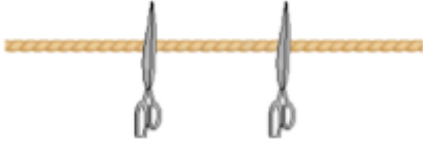

## Discrete models

## Linear models

Where possible, links are made to real life and measures

Objective, Strategy & Key Vocabulary	Area	Discrete	Linear
<p>Name the fractions one-half, one-quarter and one-third in relation to a length, shape or set of objects.</p>	<p>Children explore the concept of something being less than 1 but more than zero.</p> <p>They begin with real objects exploring whether two parts are equal or not.</p>  <p>half not half</p> <p>They move to exploring half and not half of shapes</p>  <p>half not half</p> <p><i>It has been split in half because there are two equal parts.</i></p>	<p>Now children explore this same concept using small sets of objects.</p>  <p>half not half</p>	<p>And finally using linear objects such as string or ribbon.</p>  <p>half not half</p>
	<p>Once children have explored one half, they are then introduced to one-quarter as being one of four equal parts and similarly one-third as being one of three equal parts.</p>  	 	 

# Y1 FRACTIONS

Objective, Strategy & Key Vocabulary	Concrete/pictorial	Name	Written notation
<p>Read and write the fraction notation</p> $\frac{1}{2} \quad \frac{1}{3} \quad \frac{1}{4}$ <p>And relate these to a fraction of a length, shape or set of objects.</p> <p>Each fraction should be explored using area, discrete and linear models.</p>	    	<p>One-half</p>  <p>One-quarter</p>  <p>One-third</p>	$\frac{1}{2}$  $\frac{1}{4}$  $\frac{1}{3}$

# Y2 FRACTIONS

Fraction notation—taken from NCETM PD materials

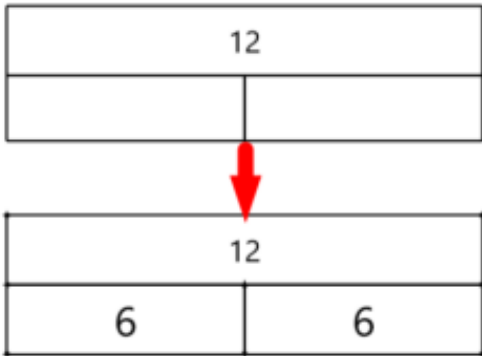

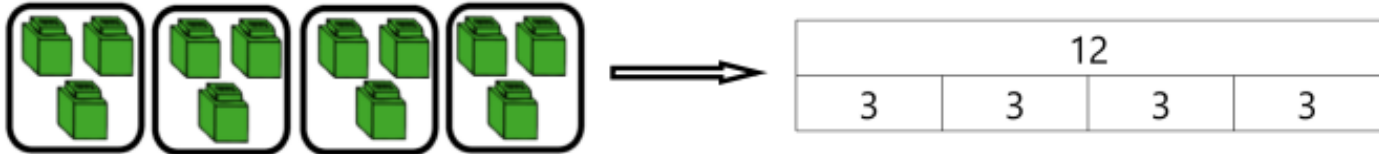

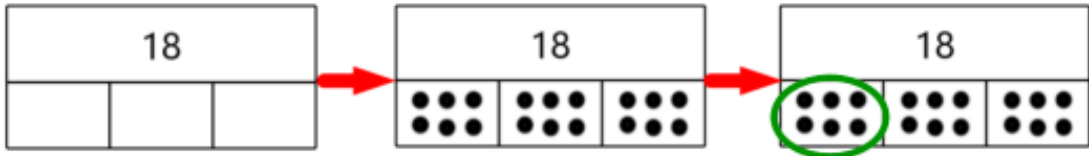

Model	Say	Write	Notation
 one-half	<i>'The apple has been divided...'</i>	Write the division bar.	$\frac{1}{2}$
	<i>'...into 2 equal parts...'</i>	Write '2' as the denominator.	
	<i>'...and we have 1 of the parts.'</i>	Write '1' as the numerator.	

Model	Say	Write	Notation
 one-third	<i>'The rectangle has been divided...'</i>	Write the division bar.	$\frac{1}{3}$
	<i>'...into 3 equal parts...'</i>	Write '3' as the denominator.	
	<i>'...and 1 of the parts is shaded.'</i>	Write '1' as the numerator.	

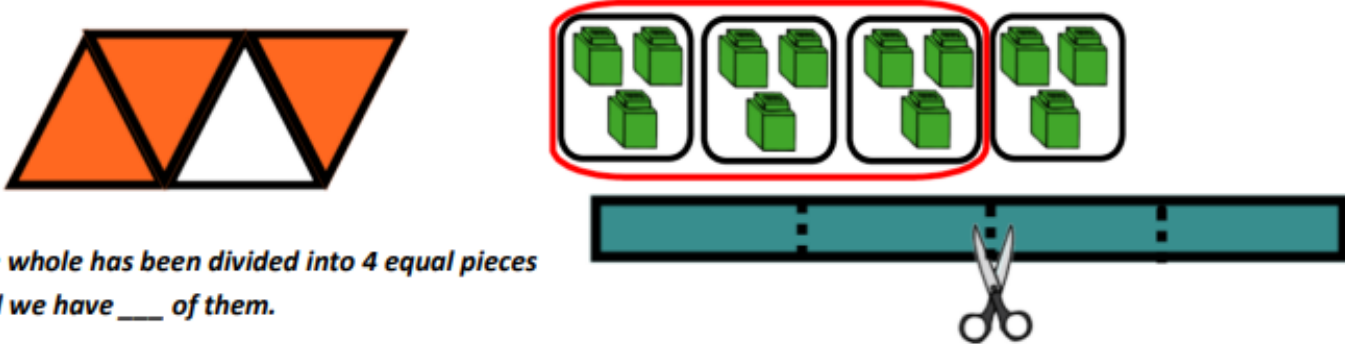

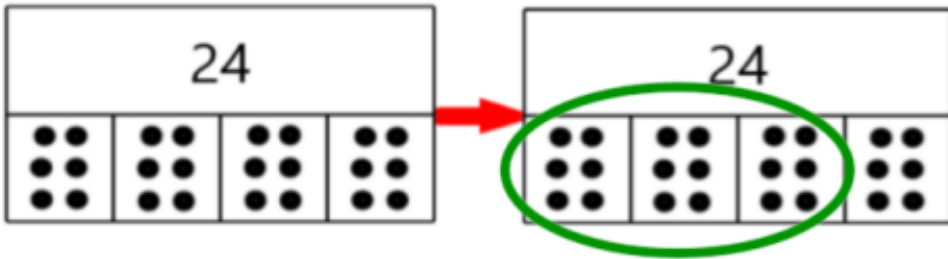

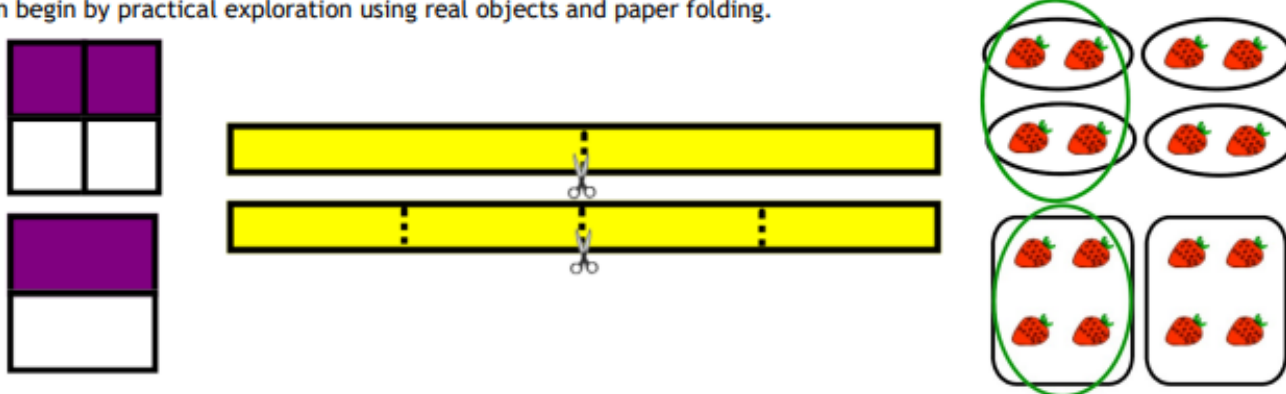

Model	Say	Write	Notation
 one-quarter	<i>'The strawberries have been divided...'</i>	Write the division bar.	$\frac{1}{4}$
	<i>'...into 4 equal parts...'</i>	Write '4' as the denominator.	
	<i>'...and 1 of the parts is circled.'</i>	Write '1' as the numerator.	

Y2

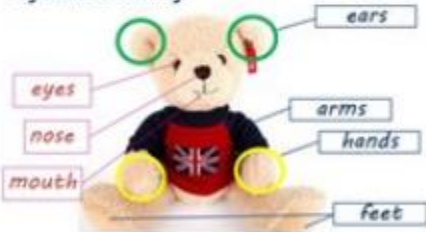

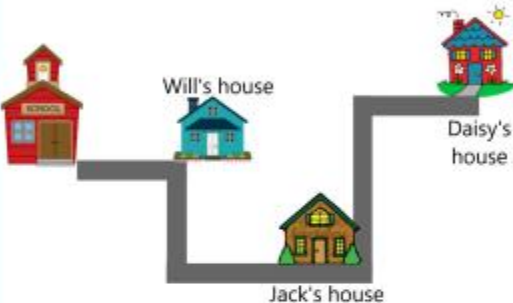

FRACTIONS

Objective, Strategy & Key Vocabulary	
Find half of numbers.	<p>Pupils learn to halve even numbers to 24 as part of their work in division. As a result, they should be familiar with the bar model representation of this.</p>  <p>The diagram shows two bar models. The top bar model is a rectangle divided into two equal horizontal sections, with the number '12' centered above it. A red arrow points down from the center of this bar to the center of a second bar model below it. The second bar model is also a rectangle divided into two equal horizontal sections, with the number '12' centered above it, and the number '6' centered in each of the two sections.</p>
Find $\frac{1}{4}$ or $\frac{1}{3}$ of a number	<p>Children in KS1 do not learn to divide by 3 or 4, therefore when finding <math>\frac{1}{4}</math> and <math>\frac{1}{3}</math> of numbers, focus is given to the learning they have made dividing bar models and shapes in to 3 or 4 equal parts.</p> <p style="text-align: center;"><b>Find <math>\frac{1}{4}</math> of 12</b></p> <p>Children begin by using cubes to find quarters of numbers. This is then represented using the bar model.</p>  <p>The diagram shows four groups of three green cubes each, arranged in a row. An arrow points from these cubes to a bar model. The bar model is a rectangle divided into four equal horizontal sections, with the number '12' centered above it, and the number '3' centered in each of the four sections.</p> <p>Children follow this same sequence when finding <math>\frac{1}{3}</math> of numbers.</p> <p>Once pupils are confident, they use the bar model, drawing dots to find <math>\frac{1}{4}</math> and <math>\frac{1}{3}</math> of numbers</p>  <p>The diagram shows a sequence of three bar models connected by red arrows. Each bar model is a rectangle divided into three equal horizontal sections, with the number '18' centered above it. The first bar model has empty sections. The second bar model has each section filled with six dots. The third bar model has each section filled with six dots, and the first section is circled in green.</p>

# Y2 FRACTIONS

Objective, Strategy & Key Vocabulary	
<p>Find <math>\frac{2}{4}, \frac{3}{4}</math> of a number.</p>	<p>Children should be confident in finding <math>\frac{1}{4}</math> of numbers before moving on to find <math>\frac{2}{4}, \frac{3}{4}</math>. They begin by using cubes.</p>  <p><i>The whole has been divided into 4 equal pieces and we have ___ of them.</i></p>
	<p>Children move to a bar model representation of this.</p> <p><i>Find <math>\frac{3}{4}</math> of 24</i></p> 
<p>Recognise the equivalence of <math>\frac{2}{4}</math> and <math>\frac{1}{2}</math></p>	<p>Children begin by practical exploration using real objects and paper folding.</p> 

Objective, Strategy & Key Vocabulary	Area	Discrete	Linear
<p>Understanding the relationship between the part and the whole</p> <p>NCETM 3.1 TP1</p>	<p>The story of the blind man and the elephant enables pupils to discover the relationship between the whole and the part.</p>  <p>Message behind the story:</p> <p>Each of the blind men cannot identify the animal because each has only felt a part not the whole of the elephant.</p>  <p>If Yorkshire is the whole, then Goole is part of the whole.</p>	<p>Children progress to understanding that several parts can make up the whole.</p>  <p>When the family is the whole, the children are part of the whole.</p> <p>If 5 cakes are the whole then two pink cakes are part of the whole.</p>  <p>Hello! I'm a Teddy bear. My name's Tommy.</p>  <p>If the teddy is the whole, then the ears are part of the whole.</p>	<p>Using a journey, children can talk about a whole journey and part of this journey.</p>  <p>If the journey from Daisy's house to school is the whole, then the journey from Will's house to school is part of the whole.</p>

# FRACTIONS

Objective, Strategy & Key Vocabulary	Area	Discrete	Linear
<p>Recognise and write fractions of a discrete set of objects:</p> <p>unit fractions</p> <p>NCETM 3.2 TP2 , 3</p>	<p>Children have already been introduced to fraction notation in KS1. Now they revisit this understanding the role of the numerator and denominator. They begin by revisiting unit fractions of a shape and applying understanding of written notation:</p> <p>Fraction bar - We are dividing into equal parts</p>  <p>Numerator - One part is shaded</p> $\frac{1}{2}$ <p>Denominator - There are two equal parts.</p> <p>When writing fractions, the fraction bar is drawn first to draw attention to the concept that the whole is being divided into equal parts. Then the denominator is written to show how many parts the whole is divided into, followed by the numerator to show how many parts are shaded.</p>	<p>Children they apply this understanding to identifying fractions of discrete amounts.</p>  <p>The whole has been divided into three equal parts. Each plate is one-third of the whole.</p> <p>Children may explore the different ways in which the whole can be divided into equal groups, saying and writing the fraction each time.</p> <p>Dividing 12 counters into equal groups:</p> 	<p>The whole is divided into 6 equal parts.</p> <p>One of these parts is yellow.</p> <p><math>\frac{1}{6}</math> of the cubes is yellow.</p>  $\frac{1}{6}$  <p>The whole has been divided into 6 equal parts. Each part is one-sixth of the whole.</p> <p>One sixth of the whole has been cut off.</p>

Objective, Strategy & Key Vocabulary	Area	Discrete	Linear
<p>Recognise and write fractions of a discrete set of Objects:</p> <p>non-unit fractions</p> <p>NCETM 3.3 TP1, 2</p>	<p>Once children are confident in identifying, recognising and writing unit fractions they apply this understanding to non-unit fractions.</p> <p><i>The whole is divided into 5 equal parts.</i></p> <p><i>4 of the parts are shaded</i></p> <p><i>4 one-eighths are shaded</i></p> <p><i><math>\frac{4}{5}</math> of the whole is shaded</i></p>  <p><i>The whole has been divided into ___ parts.</i></p> <p><i>___ of the parts are blue.</i></p> <p><i>___ of the parts are red.</i></p> <p><i><input type="checkbox"/> of the whole is blue.</i></p> <p><i><input type="checkbox"/></i></p> <p><i><input type="checkbox"/> of the whole is red.</i></p> <p><i><input type="checkbox"/></i></p> 	<p>Children begin by working with real objects to identify the equal parts and then using the stem sentence before arriving at the notation.</p>  <p>There are 5 equal parts.</p> <p>2 parts are blue.</p> <p><math>\frac{2}{5}</math> of the cakes are blue.</p> <p>What fraction are girls?</p>  <p>There are ___ equal parts.</p> <p>___ parts are girls.</p> <p>___ parts are boys.</p> <p>Can you write the fractions?</p>	<p><i>The whole is divided into 8 equal parts.</i></p> <p><i>3 of the parts are shaded</i></p> <p><i>3 one-eighths are shaded</i></p> <p><i><math>\frac{3}{8}</math> of the whole is shaded</i></p>  <p><math>\frac{3}{8}</math></p> <p>Where possible, links are made to real life and measures.</p> <p><i>How many one-tenths of a metre does the ribbon measure?</i></p>  <p>The plant measures 7 tenths of the whole metre. In height.</p>
