

Thursday 26th March 2020.

Hi! Have a look at the pictures below. They are the beans that we planted in the classroom over two weeks ago. Some have really starting growing tall. We planted the beans in different conditions; some with water, some without water. Some with sunlight and some without sunlight. Perhaps you could discuss with someone or write a sentence for each picture. Explain why you think the beans look like they do in the pictures. You could make some scientific observations about the growth of plants from what you see.

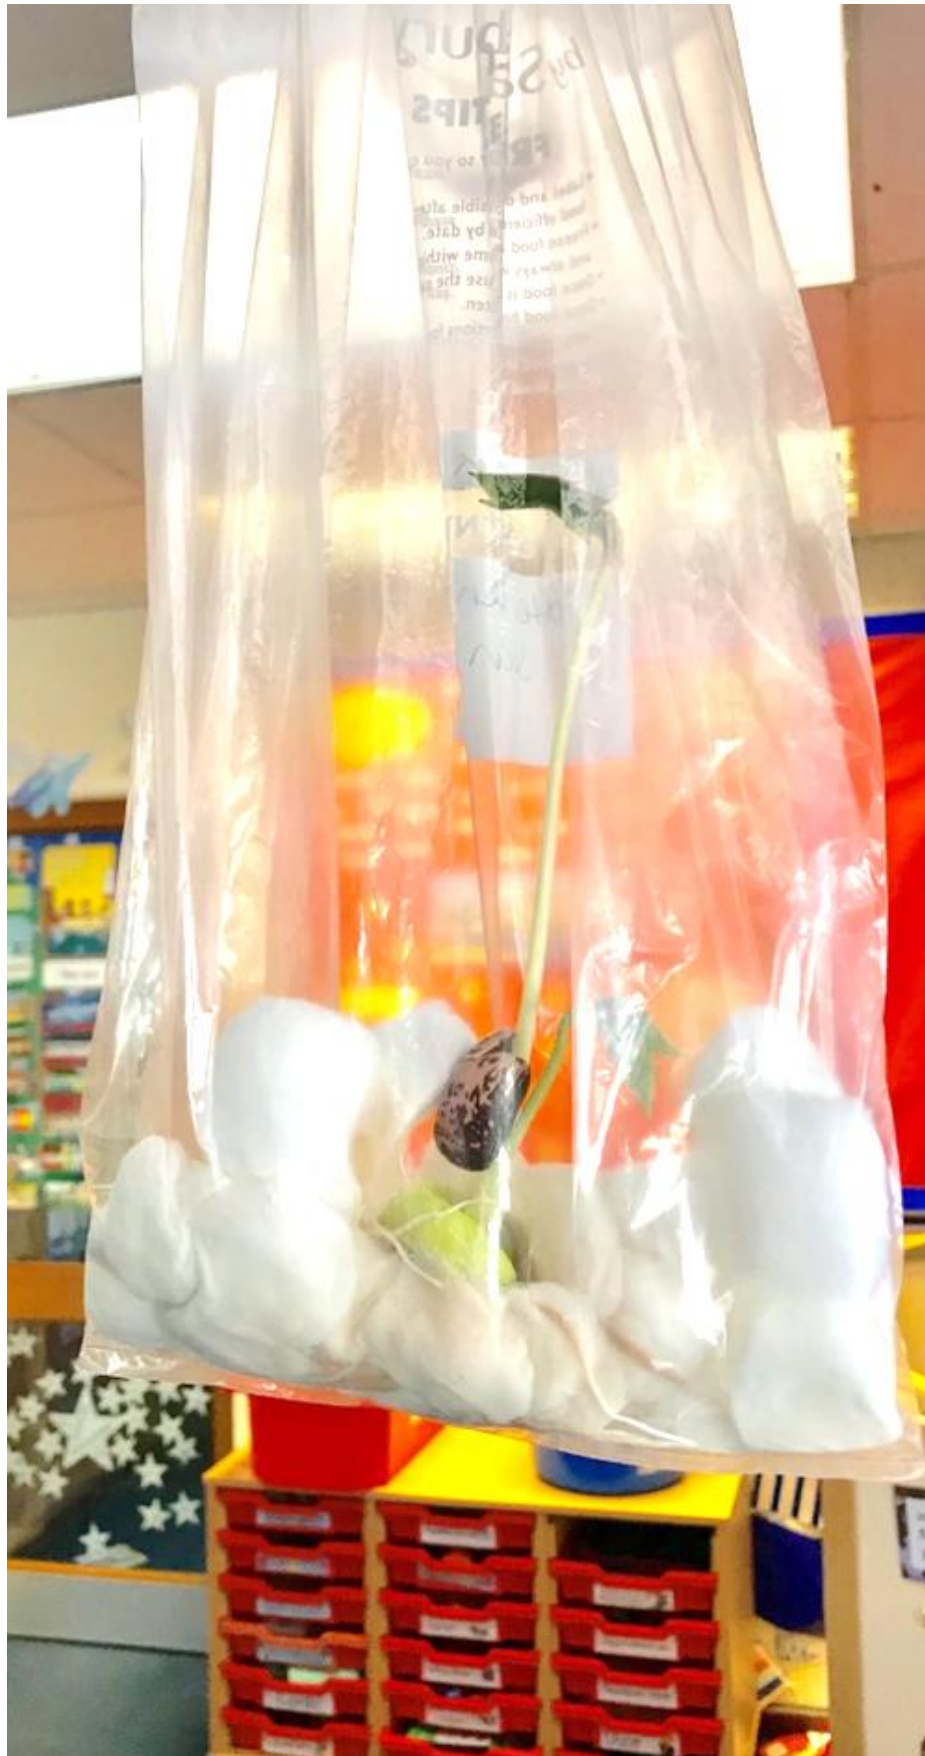

I hope you enjoy the pictures.

Miss Bennett.

Sunlight and water.

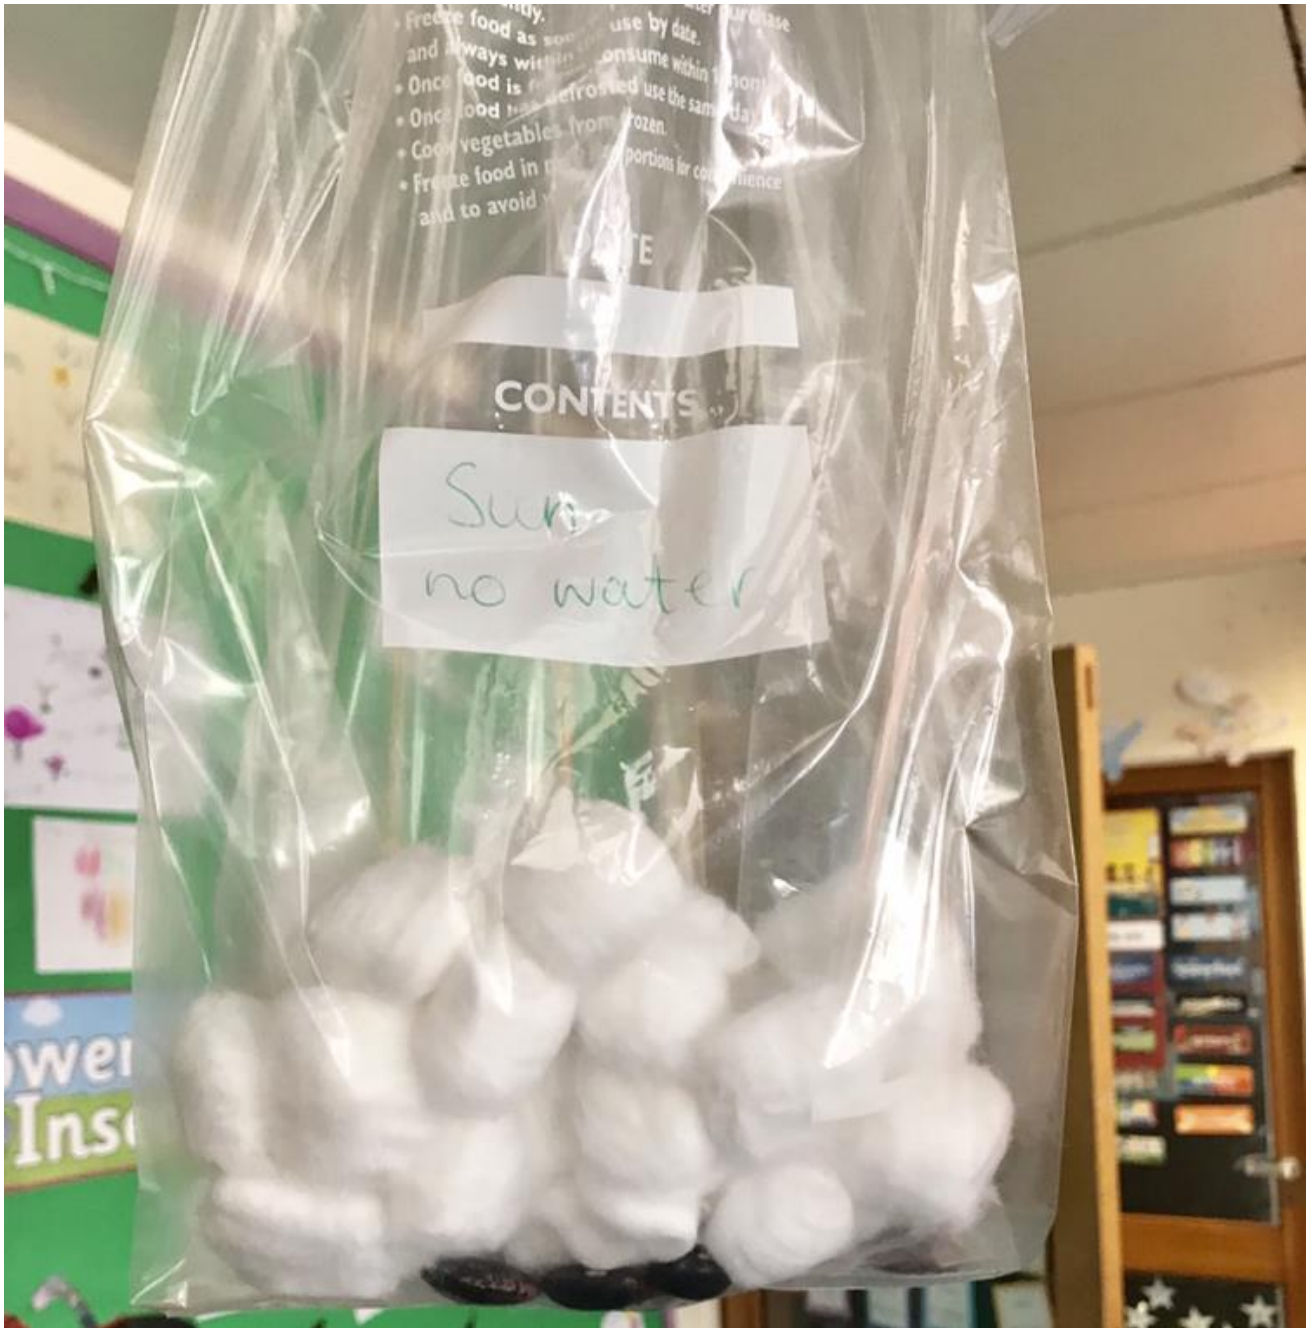

Sunlight and water.

Sunlight and water.

Sunlight but no water.

No sunlight but water.

No sunlight and no water.

No sunlight and no water.
