

3. Design Another Flying Machine

Leaf has written to all the other animals and wants for them to visit him in his home. However, the crows cannot carry all of the animals. You are going to have to design a new flying machine so that all of the animals can visit. Draw your new design, label the materials and write about how it works. **REMEMBER**...the animals only have access to materials and objects from the forest or the mountain or the seaside so your machine is going to have to be made from materials from here. Happy designing!
